### Objective and Summary

Senior software engineering leader with experience architecting and scaling distributed financial technology platforms supporting tens of millions of clients. Specializes in .NET distributed systems, cloud-oriented architectures, performance optimization, and engineering modernization initiatives, including organizational AI governance and evangelizing software delivery standards.

### Work Experience

Manager, Software Development & Engineering  
Charles Schwab  
May 2024 - Present

- Led globally distributed engineering teams in the architecture, development, and operational delivery of the Schwab Portfolio Performance Reporting platform, modernizing a legacy system that previously supported roughly 500,000 clients into a scalable distributed ecosystem now serving nearly 50 million clients.
- Directed performance tuning, resiliency, and observability initiatives across .NET C#, WebAPI, and Aerospike-based batch applications and services operating within a private cloud environment, supporting mission-critical financial reporting workloads at enterprise scale.
- Partnered cross-functionally with engineering leadership, product stakeholders, and offshore teams to drive modernization strategy, delivery execution, and engineering quality standards across high-visibility financial technology initiatives.
- Spearheaded organizational adoption of an Artificial Intelligence Development Lifecycle (AI-DLC), establishing governance, development standards, and responsible AI integration practices to guide enterprise engineering teams in the effective utilization of generative AI technologies within software delivery workflows.

Software Development Engineer Senior Specialist

Charles Schwab  
April 2019 - May 2024

- Led engineering initiatives focused on SOLID design principles, automated testing strategies, memory profiling, and performance benchmarking, improving software quality and long-term maintainability across distributed .NET services and applications.
- Created and facilitated a self-driven technical forum that promoted engineering best practices, mentorship, and technical knowledge sharing across onshore and offshore development teams.
- Contributed to modernization and scalability efforts for portfolio performance reporting systems through performance optimization, architectural improvements, and cloud-oriented engineering practices.

Software Developer

Advanced Solutions International  
January 2017 - March 2019

- Full-stack .NET developer specializing in C#, JavaScript, RESTful APIs, Entity Framework, and T-SQL within Agile, Scrum-based product teams responsible for the creation of comprehensive cloud-based software solutions for non-profits and associations.
- Crafted and performed quarterly product penetration-testing, utilizing tools including Burp Suite, Arachni, and SQLMap to identify and remediate platform vulnerabilities.

Software Developer

Dell

April 2016 - January 2017

- Developed automated testing frameworks and end-to-end test suites for Dell Consumer Services applications utilizing C#, Selenium WebDriver, and SpecFlow, while supporting operational monitoring and analytics initiatives using Splunk and Adobe Analytics.

IT Consultant

Sogeti

June 2015 - April 2016

- Delivered Microsoft-oriented software engineering and quality assurance solutions across client engagements, including automated testing initiatives utilizing Selenium WebDriver, Protractor.NET, and C# technologies for enterprise customer support platforms.

### **Current Skillset**

- Languages: C#, JavaScript (ES5/ES6)
- Platforms & Frameworks: Docker, Node.js, React, Angular
- Cloud & Observability: Pivotal Cloud Foundry, Google Cloud Platform, Splunk
- Database Technologies: Aerospike, PostgreSQL, SQL Server and T-SQL
- Engineering Practices: Performance Tuning, Parallelism, Structured Concurrency, Automated Testing, Profiling, Benchmarking, SOLID Design Principles

### **Education**

Texas A&M University, College Station, Texas - May 2015

B.S. Computer Science, Systems Engineering Track

Relevant Courses: Design and Analysis of Algorithms, Distributed Objects Programming, Networks and Distributed Programming

### **Professional Certifications**

Cloud Digital Leader

Google Cloud

Issued: November 18th, 2023

Expires: November 18th, 2027
